

Ivan Koch

Operations & P&L Leader who builds production AI systems | COO · VP Operations · General Manager

Argentina — full remote | +54 11 3396 2194 | ivankoch87@gmail.com | [linkedin.com/in/ivankoch](https://www.linkedin.com/in/ivankoch) | triaperformance.com/ai-systems

EXECUTIVE SUMMARY

Operating executive with 10+ years leading P&L, operations and cross-functional teams across SaaS, fintech and on-demand marketplaces (ClickGuard, Uber, Mercado Libre, Binance, OneLocal). Most recently COO/Integrator of a bootstrapped B2B SaaS, taking it from a -\$38K EBITDA loss in 2025 to +\$100K EBITDA in H1 2026 — 6x plan — in under six months. Builds the operating systems that make growth repeatable (EOS, scorecards, business reviews) and, unusually for an operator, the AI systems too: designs, ships and runs a self-hosted production stack of LLM agents, n8n workflows, CRM, Postgres and token-level cost accounting. Finance degree and MBA.

CORE COMPETENCIES

- P&L Ownership & Turnarounds
- EOS / OKR Operating Systems
- AI Systems & Agent Orchestration
- Workflow Automation & Integrations (n8n, APIs)
- Data Infrastructure & Analytics (SQL, BigQuery)
- Revenue Operations & Retention
- Team Restructuring & Change Management
- Pricing & Packaging

PROFESSIONAL EXPERIENCE

Founder & Operator · Triaperformance Aug 2022 – Present
Endurance coaching business (running & triathlon) in three languages, run solo alongside full-time executive roles — and the production environment where I design, build and operate AI systems.

- Grew from one athlete to 40+ coached athletes: revenue **+673% in year two and +255% in year three** (27x in two years), passing the previous full-year total within five months. Runs at a **71.6% operating margin** and **93.4% net revenue retention** on coaching (Aug 2026 close), with no employees.

AI & AUTOMATION INFRASTRUCTURE — SPECIFIED, BUILT, DEPLOYED AND OPERATED SOLO

- Self-hosted AI stack.** One Linux VPS running six Docker services (always-on LLM agent with tools and memory, n8n, Twenty CRM, Postgres, content engine, public site) behind a Tailscale private mesh with no public control plane. Guardrails designed, not defaulted; every server script version-controlled and pulled at runtime.
- Multi-agent content pipeline.** Research, writer and translator agents on cron feed a human approval gate, then git commit, build and a live page in Spanish, English and Portuguese — measured at ~\$0.20 per three-language article set.
- LLM cost observability and model selection.** Built per-caller, token-level accounting for five services sharing one API key (prompt, output and thinking tokens stored separately); it disproved the hypothesis it was built to confirm. Migrated two of four LLM consumers to a newer model and held two back — the benchmarks measured coding, not brand-voice prose.
- Lead-to-revenue lifecycle on owned systems.** Web and marketplace leads → n8n → self-hosted CRM → three-language nurture → onboarding. The agent turns plain-language chat updates into CRM writes; athlete intake runs Google Form → Postgres → Gemini-generated coach briefing.
- Monthly close and analytics.** Event pipeline into BigQuery, GA4 and Search Console, reconciled into a monthly close (roster, P&L, metrics) where every figure is reproducible from a file. The first close found blended retention hiding a product line at 27%.
- Three-language product surface.** Eleventy site with a token-gated members area, 12+ interactive training tools on two shared JavaScript engines, and a 300+ plan catalogue generated from one data file.

Director of Operations (COO / EOS Integrator) · ClickGuard Jan 2026 – Jul 2026
B2B SaaS, ad fraud prevention, <\$2M ARR · Reported to Founder/CEO · Led Sales, CS, Marketing, Product, Engineering and Data

- Reversed a -\$38K full-year 2025 EBITDA loss into **+\$100K EBITDA in H1 2026** — 6x the original operating plan — while growing revenue 37.3% YoY.
- Expanded gross margin from 51.9% to 63.1% (+11.2pp) in two quarters by restructuring four of five department managers, redesigning sales commissions and driving AI-led engineering efficiency (AI-authored code from ~35% to 90%+).
- Reduced customer payback from 11 months to under 9, and repaid 50% of a \$100K emergency operating loan from cash flow — the company's first debt repayment since the loan was issued in 2024.
- Built the company's first operating system: EOS (rocks, scorecard, accountability chart), monthly business reviews and weekly leadership meetings.

- Grew the agency customer base from ~50 to 92 after redesigning commissions to prioritize qualified-agency acquisition over single high-MRR accounts.
- Launched the first employee sentiment program (eNPS), lifting the score from 60 to 89 ("world-class") in one quarter with zero detractors.

Head of Data & Analytics (previously Chief of Staff) · **OneLocal**

Dec 2023 – Nov 2025

B2B SaaS, marketing services for SMBs (US/Canada)

- Promoted from Chief of Staff to Head of Data & Analytics after building the company's first data infrastructure on GCP from the ground up.
- As Chief of Staff, acted as internal consultant to the CEO and COO, led the company-wide OKR rollout, and drove cross-functional alignment on churn reduction and LTV.
- Designed a predictive churn-score model and built an internal Gemini-powered application that analyzes meeting transcripts for customer sentiment and team-performance insight.

Regional Operations Manager, South Cone · **Binance**

Jan 2023 – Dec 2023

- Owned go-to-market and growth strategy for Peru and Chile, translating market and user-behavior data into local commercial initiatives and budget allocation.

Head of Operations (previously Manager of Operations) · **FREENOW**

Mar 2021 – Nov 2022

Ride-hailing marketplace, Bogotá / Buenos Aires

- Led Marketplace and Growth operations, managing incentive budgets across 5 cities through P&L, elasticity and competitive modeling.
- Built a data-first culture, training a 5-person operations team on SQL and BI tooling to ground every pricing and commission decision in data.
- Presented performance results and strategic plans directly to regional leadership and the board.

Digital Accounts Value Proposition Manager, Mercado Pago · **Mercado Libre**

Nov 2020 – Feb 2021

- Owned value-proposition strategy for digital accounts across a four-country region (Argentina, Brazil, Mexico, Chile).

Business Strategy & Operations Manager (Uber Eats) · **Uber**

Jan 2019 – Nov 2020

- Built Uber Eats' first operational dashboards and KPI tooling from scratch at regional launch, stabilizing operations across 400+ restaurant partners.
- Scaled SMB data practices to the Mid-Market & Enterprise segment, then led standardized performance dashboards across the full Uber Eats region.

EDUCATION

Master of Business Administration (MBA) — IAE Business School, Universidad Austral, 2019

Bachelor's Degree in Finance — UADE, 2016

ADDITIONAL

AI & automation: Claude, Gemini API, LLM agents & multi-agent orchestration, n8n, REST APIs & webhooks, prompt and output contracts

Data & infrastructure: Python, SQL / Postgres, BigQuery, GCP (Cloud Run), GA4, Looker Studio, Docker, Linux, Caddy, Tailscale, Git

Business systems: EOS / OKRs, HubSpot CRM, Twenty CRM, Google Apps Script

Languages: Spanish (native), English (full professional proficiency)

Recognition: Winner, CFA Institute Research Challenge (Argentina & Uruguay), 2016

Outside work: 3x Ironman triathlon finisher; multiple sub-3-hour marathons
